

Activity Prompt 1:

Write down an **idea/goal** that you have to make your school or community more **sustainable**. It can be something new that you learned from the workshops today, or it can be something that you've already started.

Activity Prompt 2:

Take some post-it notes and a pen and go around the room and **look** at what people have written as their idea/goal. If you have **experience** with something someone wrote down, comment on it, **sharing** a tip, resource, or website that you think might be **helpful**.

MEET THE PANELISTS:

- Ananya
- Anara
- Arpitha
- Alex

sufferncentralsd Making wishes for the environment today with the @suffernhs @suffern._eac students.

MISSION STATEMENT

We are a coalition of student leaders who work towards environmental action. We encourage students to expand the scope of their action beyond their schools and into their larger communities. We will take action for climate solutions by sharing ideas, resources, and experiences in order to achieve a standard of school and community sustainability.

Some Project Descriptions in Our Toolkit:

- Solar charging stations
- Reusable Trays
- Hydroponics
- Gardening and Composting
- Styrofoam-Free Movement
- Hosting/ Presenting Climate Summits
- Working with Authority Figures
- Working with Government Officials
- Drawdown Challenge
- Working with Libraries
- Climate Smart Communities
- Grant Writing
